

The Jewish School

Here I am a student in the first grade, again at the Jewish school. We were only Jews at the Jewish school. I am the 3rd from the right. It was only till 4th grade. We studied everything there, including Hebrew language, exactly the same way as they do at my granddaughter's school now. We went to the Synagogue every Friday evening when I was a student at the Jewish school. There were some parts of the service in which we took part also. My grandmother was very proud that I sang in the temple. After the Jewish school, we went to schools for primary education.
