

The Student Report Of Noe Gatlan

This is my father, Noe Gatlan's student report, issued in Torino, Italy in the 1920s.

My father was born in 1904. He studied in Italy. His family sent him to medical school there - he studied surgery in Turin between 1924 and 1929. So he was a medical school graduate. He didn't become a surgeon; he was specialized in skin and venereal diseases. Even the post on the practice our family used to have said that. I don't know if my father did his military service, but I know he worked as an army physician in Braila. I don't know for how long he did that, because I don't have any papers. Had I had such papers, I might have got some aids, because I know they sent some from Germany. So he worked as a physician in the Romanian army for a while.
