

Gyuri Feheri

This is a picture of my second son Gyuri Feheri, taken in Budapest in 1955. He was born in 1953. Gyuri graduated from Eotvos Lorand University majoring in Hungarian and Aesthetics. When it turned out that kidney disease is treated better elsewhere than here, he left. First he went with a scholarship, then in Berlin he made contacts in the Hungarian House and he has worked there since then, he is a program manager there.
